EDUCATION

Trinity College Dublin

Dublin, Ireland

BA (Mod.) and Master in Computer Science (MCS)

Sept. 2023 – May 2028 (Expected)

- Relevant coursework: Machine Learning, Computer Vision, Computer Graphics, Internet Applications, Artificial Intelligence, Data Structures and Algorithms

EXPERIENCE

HubSpot

Dublin, Ireland

Software Engineering Intern – Rep Quoting Experience

May 2026 – Present

- Develop backend features supporting sales representatives as they create and manage quotes and deals
- Build and maintain Java services in an event-driven architecture, working with Kafka, SQL-backed data flows, and internal APIs
- Write automated tests and contribute through code review and CI/CD workflows in a Kubernetes-based engineering environment

Formula Trinity

Dublin, Ireland

AI Captain

Jul. 2026 – Present

- Lead the autonomous software programme across perception, state estimation, path planning, control, simulation, and vehicle integration
- Coordinate AI-ADS integration for the team's first human-drivable autonomous vehicle, defining commands, feedback, readiness, and failure behaviour
- Contributed to the team's best Formula Student UK autonomous result: 5th overall, 4th in Trackdrive, and 1st in Real-World AI

Control Lead

Aug. 2025 – Jul. 2026

- Led development and validation of a ROS 2 control stack in C++ and Python, including path tracking, speed control, and vehicle command interfaces

IBM Academic-Industry Project

Dublin, Ireland

Product Owner and Software Engineer

Jan. 2026 – Apr. 2026

- Led an eight-person Agile team building a novice-friendly TORCS racing simulation package with a GUI, environment setup, and PPO training workflows
- Defined sprint scope, acceptance criteria, and documentation for an Ubuntu 22.04-compatible teaching and experimentation platform

Guidewire Academic-Industry Project

Dublin, Ireland

Software Engineer

Jan. 2025 – May 2025

- Built a project-management dashboard using a React and Material UI frontend with a Django REST backend and JWT authentication
- Designed REST APIs and issue-tracking workflows while collaborating through GitLab in an Agile development team

Trinity College Dublin

Dublin, Ireland

Teaching Demonstrator – Engineering and Computer Science

Sept. 2025 – Present

- Support practical labs in object-oriented programming, system design, and embedded development using C++, Arduino, and Processing

PROJECTS

Multithreaded HTTP/HTTPS Proxy | Java, TCP/IP, Sockets

2026

- Implemented a Java forward proxy supporting standard HTTP requests and HTTPS tunnelling through the CONNECT method
- Handled concurrent clients, socket lifecycle, request parsing, bidirectional stream forwarding, and network error responses

Formula 1 Statistics Platform | Java, Spring Boot, MariaDB, Next.js

2025

- Developed a full-stack Formula 1 analytics platform using Spring Boot 3, JPA, Flyway, MariaDB, Next.js 15, and React 19
- Ingested and normalized OpenF1 data through backend services and exposed race, driver, and standings data through REST APIs

TECHNICAL SKILLS

Languages: Java, Python, C++, SQL, TypeScript, JavaScript

Frameworks and Systems: Spring Boot, Django REST Framework, React, Next.js, ROS 2, Kafka

Tools and Platforms: Docker, Kubernetes, Git, GitHub, GitLab, Linux, MariaDB, CI/CD
